INTRODUCTION

INTRODUCTION

This publication is the first in an annual series presenting statistics on Alberta's manufacturing industry. The basis for the statistics collected was an annual Census of Manufactures survey conducted jointly by Statistics Canada and the Alberta Bureau of Statistics for the years 1971, 1972 and 1973.

The main feature of the publication is the provision of principal manufacturing statistics to the most disaggregated level of industrial detail possible at the province, census division and urban municipality levels. A supplementary set of tables providing principal manufacturing statistics by the industrial activities of agricultural processing; petrochemicals; metals and equipment; forestry products; non-metallic mineral products; and, manufacturing industries, n.e.s., respectively, are also included.

The principal tabulations presented in this publication are listed below:

Section 1: Principal Manufacturing Statistics by Industry, Alberta, 1971-1973

Tables present principal statistics by industry group and industry for Alberta.

Section 2: Principal Manufacturing Statistics by Industry, Major Centres, Alberta, 1971-1973

Tables present principal statistics by industry group and industry for Calgary, Edmonton, Lethbridge, Medicine Hat and Area, and Red Deer.

Section 3: Principal Manufacturing Statistics by Industry Group, Census Divisions, Alberta, 1971-1973

Tables present principal statistics by industry group for Census Divisions in Alberta. More detailed breakdowns of the data for these areas are not available.

Section 4: Principal Manufacturing Statistics, Selected Centres by Census Division, Alberta, 1971-1973

Tables provide principal statistics for selected centres in Alberta. The data relate only to the total manufacturing activity taking place in the centres listed.

Section 5: Principal Manufacturing Statistics, Type of Industrial Activity by Component Industries, Alberta, 1973

Statistical tables show the manufacturing component of the industrial activities of agricultural processing; petrochemicals; metals and equipment; forestry products; non-metallic mineral products; and n.e.s. manufacturing industries.

DEFINITIONS

Principal Manufacturing Statistics - Consist of: the number of manufacturing establishments; employees, wages and salaries; cost of materials and supplies; cost of fuel and electricity; value of shipments and value added.

Establishment - Smallest operating unit capable of reporting certain specified input and output data; usually a plant or mill.

Employees, Salaries and Wages - Employees, as used in this publication, include all persons engaged in the manufacturing industry, including working owners and partners. Salaries and wages are reported before deductions for income tax and employee benefits and comprise all man-hours paid (for regular work, overtime and paid leave) as well as bonuses, commissions, etc. paid to regular employees.

Cost of Materials and Supplies, Fuel and Electricity - Generally, consumption of purchased items only, at laid-down cost. Includes intercompany and intracompany transfers, contract work by others and fuel used by vehicles.

Value of Shipments of Goods of Own Manufacture - Gross value of goods produced by the reporting establishment, or for its account, from its own materials, net of discounts, returns and allowances, sales tax, excise taxes and duties, returnable containers and common or contract carriers' charges for outward transportation (but not of own carriers' delivery expense). It includes repair

and custom revenue, transfers to reporting units of the same firm, all exports, and book value of own products shipped on a rental basis. Unsold domestic consignment shipments are not included.

Value Added - Net output as measured by gross output less purchased commodity inputs used and contract work by others; or, value of shipments of goods of own manufacture less cost of materials and supplies and cost of fuel and electricity used.

Note: In Statistics Canada publications, the net change in inventory of goods in process and finished goods is taken into account in calculating value added. This variance in approach should account for differences between value added statistics in the two sets of publications.

Standard Industrial Classification (SIC) - SIC is a method of uniformly categorizing establishments engaged in the same or a similar kind of economic activity. Results of the 1971, 1972 and 1973 Census of Manufactures, as presented in this publication, utilize the 1970 revision of the Standard Industrial Classification. A complete description of these SIC codes is found in Appendix II, page 119.

PUBLICATION CRITERIA

Statistics presented in this publication conform to confidentiality guidelines of The Statistics Bureau Act, 1958, which prevents disclosure of information pertaining to individual establishments. An asterisk in place of any statistic indicates that disclosure is not possible. To prevent residual disclosure of a confidential statistic, it has been necessary to suppress other statistics.

Disclosure of the number of establishments belonging to any particular industrial group is not governed by the Act and therefore these statistics are presented in all tables.

ACKNOWLEDGEMENTS

Appreciation is extended to the many establishments which regularly provide the statistics necessary for the preparation of this publication. In addition, we wish to acknowledge the co-operation and assistance provided by the Manufacturing and Primary Industries Division, Statistics Canada, in the conduct and sharing of statistics of the annual Census of Manufactures.

HIGHLIGHTS

The purpose of this section is to summarize the statistics presented in this publication and to show the relative importance of manufacturing to the Alberta economy.

The following tables present:

- a) Statistics showing the contribution of Alberta's manufacturing industry to total value added of goods producing industries, employed labour force and gross domestic product of Alberta (Tables I, II and III respectively).
- b) Total value of manufacturers' shipments by industry groups for 1973 are presented with a comparison of their respective industry share in 1971, (Table IV).
- c) The total value of manufacturers' shipments by five Alberta cities, (Table V).
